ARCHITECTURE

INSTITUTIONAL DESIGN

Church of the Ascension

LOCATION

Rockville Centre, NY

SERVICES PROVIDED

Space Planning, Engineering, Architectural and Interior Design, Furniture Furnishing and Equipment (FFE), Lighting Design

PROJECT TYPE

Renovation

PROJECT HIGHLIGHTS

This aging, but beautiful church needed to be retrofitted to accommodate a new, state-of-the-art pipe organ and sound system. **AOF** had to engineer a new structural system that would augment the existing structure and support the new windpipes. In addition, **AOF** had to determine if the existing church building could support the power and volume of the new organ. And of course, the entire renovation needed to be performed while church still served the needs of the congregation.
