Barasso Residence

LOCATION
East Moriches, NY

PROJECT TYPE
New Construction

PROJECT SIZE
6,000 sq. ft.

ASSIGNMENT

From overall programming, and studying solar orientation (for placement of windows, skylights and doors) to special hurricane-resistant features and interior design that created unique and private spaces, this challenging assignment took two years to complete.

RESULT

AOF designed a house with many different functional spaces and innovative passive solar features by combining stunning views internally and externally with lavish details throughout the home.
