

ART OF FORM  
ARCHITECTURE

RETAIL

# North Shore Honda

LOCATION  
Glen Head, NY

PROJECT TYPE  
Renovation

PROJECT SIZE  
5,000 sq. ft.

## PROJECT HIGHLIGHTS

This preexisting dealership needed to redesign its space to be branded to the new corporate prototype. The project entailed working within a space that had out of date building systems and needed the showroom and sales areas to be fully functional at all phases of renovation.

## ASSIGNMENT RESULTS

AOF conducted an extensive research program and determined that a new structure had to be added to augment the existing structure. In addition, the exterior façade, which was decaying, needed a totally new treatment. AOF took the new corporate prototype and molded it to the existing space while updating the pre-existing building's infrastructure. AOF provided Architectural Design, Space Planning, Structural Engineering as well as the securing of all required permits.
